**Graduation rates** are calculated by taking the number of starts minus withdrawals divided by total starts (excluding students unavailable for graduation due to death, military duty, incarceration, or medical reason).
**Employment rates** are calculated by taking the number of graduates employed in the field of study divided by the total number of graduates (excluding graduates unavailable for employment due to further education, death, military duty, incarceration, or medical reason).
**Retention Rates** are calculated by taking the denominator = students who began school during the reporting period plus transfer from another program minus transfers to another program.

| | Numerator = Number of retained students still in program. (Exclude from the calculation the following categories: active military service deployment, death, incarceration) |
